

Light Outside

Wakey!Wakey!

I know you want to stay in bed
But it's light outside
It's light outside

So know I am going to stay right here
Because you saved my life once
You saved my life

And I would try to get you out because it's beautiful outside
And we will fall
We will try
And do our best and I love you otherwise
Because you saved my life once
Because you saved my life once

I know you want to rest your head
and just forget the night
forget the night
So you know I am going to stay right here
And sit by your side
By your side

And I would try to get you out because it's beautiful outside
And we will fall
We will try
And do our best and I love you otherwise
Because you saved my life once
Because you saved my life once

I think you always knew would be
I think you always knew would be
The greatest
I think you always knew would be
I think you always knew would be
The greatest

Because you saved my life once
Because you saved my life once
