

Wake Up

Waldeck

Theres a guide to take me home
Led me through the night
Stood against the storm
And taught me pride
Did they weigh you down
Did they boil the salt
Did they mess you up
In your fancy loft baby
Theres a smile that broke my heart
That sparkles in your eyes
Your falling apart
Now your living lies
Did they change the rules
Without telling you?
What a suprise
Who needs who now baby
Take a break and come down
Take a chance and start
Take a look in the mirror
Take the pill to wake up
Take a break and come down
Take a chance and start
Take a look in the mirror
Take the pill to wake up
Wake up

Theres a spirit of our youth
Wont solves your thoughts
Used to care about truth
And fight against the odds
Did they make you trade
The dreams of old
Did they tell you
It was cool to be cold baby
Theres a light that you once shown
Clouded you la don ??
Everything is lone
And everybody is gone
Was life rough on you
Did it fit no more
As we fibbin you to my dorm ??
Now baby

Take a break and come down
Take a chance and start
Take a look in the mirror
Take the pill to wake up
