

Nations battle nations to keep what security they have
Money and economics their main living factor
Athenian is their control
We control controlling what your way of living
But who decides Congress
United blood lies for how long we are destroying

To remain on top we will fall
Nations growing faster population is out of hand
Technology breakthrough their military power overtakes
So we try to cut them down to something that their not
for the upper hand
The first amendment means nothing in a world of hypocrisy
And war, fuck your war, fuck your controlling culture
We fight to survive
Why do we have to fight to die
