

When The Cold Wind Blows

Waterdeep

When the cold wind blows all around
Will You still love me, still love me?
When the cold wind blows all around
Will You still love me?

When the lightning crashes
Hopes are dashed and I am asking
How this comes to me and why

When no home on Earth can be found
Will You still love me, still love me?
When no home on Earth can be found
Will You still love me?

When You left us last time
You said You'd return
And I'm sorry that it
Takes so long to learn

That my hope is to walk forever
In the coolness of the day
Oh, my hope is to walk forever
In the coolness of the day

When no home on Earth can be found
You will still love?
When the cold wind blows all around
You will still love me?
