Don't Forget Me

Way Out West

There's just one thing that I need to say Before I close my eyes and walk away There's just one thing that I need to feel Before I walk away against my will There's just one thing that I need to hear Before I walk away for the last time There's just one thing that I need to see Before I take this chance and set us free

don't forget me Don't regret me Don't suspect me Don't neglect me

The memory of this still reminds me of you The memory of this still reminds me The memory of this still reminds me of you That is where you'll find me

Stars in your eyes Did you take the time to realize Can you count the stars in your eyes Did you take the time to realize
