

# Friend Like Me

Wayne Wonder

Pinky promise  
It's gonna be alright  
It's gonna be alright  
It's gonna be alright  
It's gonna be alright

Many late nights when she's all alone  
She always call me up on the phone  
Begging me to come and spend the night  
Because she wants to rub me in her honeycomb

What she need is just a friend like me  
What she need is just a good friend like me  
What she need is just a friend like me  
What she need is just a good friend like me

Told her friends that I treat her right  
And I love to vibe all day  
Feels so good just to be around  
A lotta times she don't want me to go away

What she need is just a friend like me  
What she need is just a good friend like me  
What she need is just a friend like me  
What she need is just a good friend like me

After all you can't deny  
I took her where her feels  
Can't go on, you can't pretend  
That's why she's asking me again

What she need is just a friend like me  
What she need is just a good friend like me  
What she need is just a friend like me  
What she need is just a good friend like me

It's gonna be alright  
It's gonna be alright  
It's gonna be alright  
It's gonna be alright  
It's gonna be alright  
It's gonna be alright

What she need is just a friend like me  
What she need is just a good friend like me  
What she need is just a friend like me  
What she need is just a good friend like me

What she need is just a friend like me  
What she need is just a good friend like me  
What she need is just a friend like me  
What she need is just a good friend like me

What she need is just a friend like me  
What she need is just a good friend like me  
What she need is just a friend like me  
What she need is just a good friend like me

What she need is just a friend like me  
What she need is just a good friend like me  
What she need is just a friend like me  
What she need is just a good friend like me  
True
