

## Pittsburgh

**We Are Scientists**

All these whispers and promises  
All the hints and the solid prends

All we want is to be together  
All we want is to be together

Every subtle and stolen glance  
Can't be anymore obvious

All we want is to be together  
All we want is to sleep together

Were only after one thing (6x)

All this ruptures in etiquette  
All this comforting decadence

All we want is to be together  
All we want is to sleep together

Were only after one thing (6x)

I'd love to know  
What else we've done  
Without the hope  
Without the hope

Were only after one thing (10x)
