

Lights Out

We Are the In Crowd

I've been keeping track of everything
Notes and maps of where I've been
Somehow I've always found
I way to sleep through unfamiliar sounds
I lost myself in FM airwaves
And found a way to keep my mind straight
I'm living well, at least in my head
And letting go of what you said

Everybody come a little bit closer
Everybody sing a little bit louder
We run this town tonight

So keep your fingers crossed
Hide them behind you back
I'll hold my breath
And let you fill the room
With smoke and mirrors things look clearer
Just don't panic
So chase your words with your tongue
'Cause you can't avoid me now

I lost track of the little things
The cliques at home and the guilt they bring
Somehow I figured out
How well you keep your secrets now

I guess I'll keep it on the tip of my tongue
Another verse that won't be sung
Is bitterness supposed to taste this sweet to me?

Everybody come a little bit closer
Everybody sing a little bit louder
We run this town tonight

So keep your fingers crossed
Hide them behind you back
I'll hold my breath
And let you fill the room
With smoke and mirrors things look clearer
Just don't panic
So chase your words with your tongue
'Cause you can't avoid me now

Lights out Poughkeepsie
You'll be just fine without me
Tell me the stories when I get home

Everybody come a little bit closer
Everybody sing a little bit louder
We run this town tonight

So keep your fingers crossed
Hide them behind you back
I'll hold my breath
And let you fill the room
With smoke and mirrors things look clearer

Just don't panic

So keep your fingers crossed
Hide them behind you back
I'll hold my breath
And let you fill the room
With smoke and mirrors things look clearer
Just don't panic
So chase your words with your tongue
Because you can't avoid me
Because you can't avoid me
