

## Remember (To Forget You)

We Are the In Crowd

All my exes live in text,  
It's just a symptom of the times  
And these miscommunications  
We can leave between the lines.

How do I know you and me won't make it if we don't try?  
We're just stuck here in the mean time

I gotta remember to forget you  
Cause you're always on my mind  
I can never remember how I met you,  
And every time I try

I can't find a way to cover your face  
With the truth inside the lies  
I gotta remember to forget you  
Cause you're always on my mind

I've got a complex for every message  
And I sit and wonder why  
I've got letters stacked in boxes  
And you're the subject every time

How do I know you and me won't make it if we don't try?  
We're just stuck here in the mean time

I gotta remember to forget you  
Cause you're always on my mind  
I can never remember how I met you,  
And every time I try

I can't find a way to cover your face  
With the truth inside the lies  
I gotta remember to forget you  
Cause you're always on my mind

We're drowning in jealousy  
Of people we wanna be  
We're drowning in jealousy  
Of people we wanna be

I can't stand to be myself  
I could be anybody else  
We're drowning in jealousy  
Of people we wanna be

I'm so sick of being everything  
To everyone but me.

I gotta remember to forget you  
Cause you're always on my mind  
I can never remember how I met you,  
And every time I try

I can't find a way to cover your face  
With the truth inside the lies  
I gotta remember to forget you

Cause you're always on my mind

Cause you're always on my mind
