## Remember

## We Are the In Crowd

All my exes live in Texas, Just a symptom of the times And these miscommunications We can leave between the lines.

How do I know you and me wont make it if we don't try? We're just stuck here in the mean time

I gotta remember to forget you Cause you're always on my mind I can never remember how I met you, And every time I try

I can't find a way to cover your face With the truth inside the lies I gotta remember to forget you Cause you're always on my mind

I've got a complex for every message And I sit and wonder why I've got letters stacked in boxes And you're the subject every time

How do I know you and me wont make it if we don't try? We're just stuck here in the mean time

I gotta remember to forget you Cause you're always on my mind I can never remember how I met you, And every time I try

I can't find a way to cover your face With the truth inside the lies I gotta remember to forget you Cause you're always on my mind

Drowning in jealousy
Of people we wanna be
We're drowning in jealousy
Of people we wanna be

I can't stand to be myself I could be anybody else We're drowning in jealousy Of people we wanna be

I'm so sick of being everything To everyone but me.

I gotta remember to forget you Cause you're always on my mind I can never remember how I met you, And every time I try

I can't find a way to cover your face With the truth inside the lies
I gotta remember to forget you

Cause you're always on my mind

Cause you're always on my mind
