

## The Bright Side

## We Shot the Moon

I'm just fine, you got me looking on the bright side  
You got me looking  
You got me looking  
I lost my fear because fear is never living  
You got me looking  
You got me looking

All these promises were made  
Hey I'm living full stride  
I will get this right tonight  
Hey theres movement in me that runs very deep inside

My old man told me life is just beginning  
You got me looking you got me looking  
I climb these stairs but they always leave me empty  
You got me looking  
You got me looking

All these promises were made  
Hey I'm living full stride  
I will get this right tonight  
Hey there's movement in me that runs very deep inside  
Hey my feet found the beat they dance through the street tonight  
t  
Hey there's movement in me that runs very deep inside  
I'll I'll run to you (ill run to you)

Hey I'm living full stride I will get this right tonight  
Hey there's movement in me that runs very deep inside  
Hey I'm living full stride I will get this right tonight  
Hey there's movement in me that runs very deep inside

I'm just fine I'll be looking on the bright side

[Piano:]

I'm just fine, you got me looking on the bright side  
You got me looking
