

From Here to Mars

We the Kings

5 minutes left until daylight.
4 million reasons not to say goodbye.
3 words that won't even describe,
The 2 of us are one of a kind.

Come get a little closer to my side,
To my side,
Closer to my side,
To my side.

We fell in love under the stars.
You held me close and stole my heart.
We lit the sky and made it ours
From here to Mars.
We're in love, we're in love,
We're in love, ah ah.
We're in love, we're in love, ah ah
You could see the love in both our hearts
Like shooting stars from here to Mars.

Forever lost inside your eyes,
Every galaxy spinning inside.
The view from here is so sublime,
The kind that turns the day to the night.

Come get a little closer to my side,
To my side,
Closer to my side,
To my side.

We fell in love under the stars.
You held me close and stole my heart.
We lit the sky and made it ours
From here to Mars.
We're in love, we're in love,
We're in love, ah ah.
We're in love, we're in love, ah ah
You could see the love in both our hearts
Like shooting stars from here to Mars.

We fell in love under the stars.
You held me close and stole my heart.
We lit the sky and made it ours
From here to Mars.
We're in love, we're in love,
We're in love, ah ah.
We're in love, we're in love, ah ah.
You could see the love in both our hearts,
Like shooting stars from here to Mars.
