

Kiss Me Last

We the Kings

Don't read your list to me
You know I've got my own
Rewrite your history
'Cause no one needs to know, whoa-oh
Won't change a thing for me
So just kill the standoff
Bury the memories
Here's where the story ends tonight

Kiss me last
'Cause I don't care
You're choking on your words
Kiss me last
The past is past
Don't ask, don't tell me, girl
When will you wake up?
For just for once, don't expect the worst
Kiss me last
Don't care who kissed you first

The party, the night we met
No sleep till the sun
There's no way I could forget
Chasing shots down with your tongue, whoa-oh
We lay on your feather bed
Tangled in sheets
You've heard the song before
But it's finally you and me tonight

Kiss me last
'Cause I don't care
You're choking on your words
Kiss me last
The past is past
Don't ask, don't tell me, girl
When will you wake up?
So just for once, don't expect the worst
Kiss me last
Don't care who kissed you first

And now here we go
Chasing our tails
Back to the start
Why do we always end up here?
Stop counting your fingers
Don't tell me about your lovers

Kiss me last
'Cause I don't care
If you're choking on your words
Kiss me last
The past is past
Don't ask, don't tell me, girl
When will you wake up?
So just for once, don't expect the worst
Kiss me last
Don't care who kissed you first

I don't care who kissed you first
I don't care who kissed you first
