

Can It Be Done

Weather Report

Can it be done? Tell me is there one melody that's never been played? How does it sound? Can it be found? That new song, that's never been in the air. I've searched so long it seems it just isn't there, that melody that's never been in the air.

Look for a line that's new hoping to run into a new sound that's never been heard

I've heard a lot of music in my lifetime and somehow it all sounds the same. Is there a sound to choose? One that's never been used by anyone, anywhere?

Can it be done? Is there one melody that's never been played? How does it sound? Can it be found? That new song that's never been in the air.

I've searched so long it seems it just isn't there that melody so fresh and bright.
