## **Tried and True**

Ween

At the dawn I woke, I was alone rising I called upon the force of time and space, calling And as she came to me I fell back down realizing Oh, that it's cool for you to love me now I'm everything

Everything 'cause tried and true, I see the light in you Oh, can you dig in my soul, could you smell my whole life?

You bent the edge, eclipsed and turned around aligning And though the dark sparked rays of violet light blinding I went about the job of sowing thoughts and feelings Oh, some were good and some bad, I felt the cries of healing

'Cause tried and true, I see the light in you Oh, can you dig in my soul, could you smell my whole life?

Rise, my dawn, you've been awake too long Let me rest in time while I blow your mind

At the dawn I woke I was alone rising, I catch it I called upon the force of time and space calling, see them And as she came to me I fell back down realizing, creation Oh, that it's cool for you to love me now I'm everything, I am

Everything 'cause tried and true, I see the light in you Oh, can you dig in my soul, could you smell my whole life?
