

Another World

Westlife

And another life
Maybe we see everything
In a different light
Like an endless summer
And in the years from now
We'll all be living
The same old certain dream
That we imagined would be

Chorus:

Somewhere high
Somewhere high above the clouds
We could live there safe and sound
Far away from where we are
Yeah we'll find our star
But maybe that's another world

In another life
We would fall in love you see
And the sun would shine
For you and me yeah
Chasing the storm from the sky
Altogether love would come and save us
And we would let it take us

Chorus

Far away from where we are
Yeah we'll find our star
But maybe that's another world
