Don't Let Me Go

So much to say But where do I start Would you listen if I spoke from the heart It's simple things That keep us apart You know it doesn't have to be this way

Can't you hear it in my voice You gotta listen when I say

Don't let me go when I'm this low Why can't we talk about it Why can't we figure it out I wanna know as people grow How do they sort it all out Work out what love is about So tell me now yeah I've gotta know When this feeling I've got won't let go

Some people stop And some people start I'm hearing whispers that you no longer care Should I stay Should I turn away Stop playing games now you know it's not fair

Can't you hear it in my voice You gotta listen when I say

Don't let me go when I'm this low Why can't we talk about it Why can't we figure it out I wanna know as people grow How do they sort it all out Work out what love is about So tell me now yeah I've gotta know When this feeling I've got won't let go

You make me think I've got this feeling for you I've tried so hard, won't you listen to me? Cause we can make it we can see this through Let me start by telling you

Don't let me go when I'm this low Why can't we talk about it Why can't we figure it out I wanna know as people grow How do they sort it all out Work out what love is about So tell me now yeah I've got to know When this feeling I've got won't let go
