

Open Your Heart

Westlife

I didn't mean to let you down
You have to believe it
I don't know what went
through my mind
But now I can see

That I waited too long
To tell you how much it matters
Just to be right here with you
But I couldn't think of anything better
I should have told you so

R: Baby open your heart
Won't you give me a second chance
And I'll be here forever
Open your heart
Let me show you how much I care
And I will make you understand
If you open your heart
To love me once again

I'll try to make it up to you
I want you to know (you have to know)
Baby I swear that I'll be true
And never let go

If I waited too long
To tell you how much it matters
Just to be right here with you
But I couldn't think of anything better
I should have told you so

R: Baby open your heart...

We could relive this pain and sorrow
But we better do it in time
Start over here and save tomorrow
I wanna make you mine

R: Baby open your heart... (2x)
