## **High on the Happy Side**

Wet Wet Wet

Everything seemed the same tonite And then the moon went out In the middle of the sky And the rain goin' up again Let it all come down, let it all come down You want to hear how the story goes You want to see how you're never told Where lies this fool's gold

Everytime that you say goodbye, I sit and wonder why Why all this happiness, now there's nothing goin' on Everytime that you say goodbye, I'll sit and I'll get high High on the happy side again

I hear the songs on the radio But they don't turn me on I hear the world's been shakin' up again And the deals been done, and the storm it has begun You want to hear how the story goes You want to see but you're never told Where lies this fools gold
