

You've Had It

Wet Wet Wet

Where have you got to lately
Where are you going to be
And I thought about it yesterday now baby
It's in my cuts now baby
As deep as yours
And the scars from this are gonna last for ever
And ever

You've had it
What you're getting from me
You've had it
Now what's it going to be
You've had it
What you're getting from me
But all I want to do is be with you

Now that you've got me baby
You're just as sharp as me
And I'm glad you've cut me off
Writing my lies on the back of your hand
Tearing me up and watching you land
Sitting your heart on the sofa with me

You've had it
But you're getting to me
Now what's it going to be
But you're getting to me
Now what's it going to be
You've had it
But all I want to do is be with you

Where have you got to baby
'Cause look what you've done
And you know that this goes
On and on and on and on

You've had it
What you're getting from me
You've had it
But you're getting to me
You've had it

You've had it
What you're getting from me
You've had it
But you're getting to me
You've had it
What you're getting to me
You've had it
But all I want to to is be with you
