

No Fear To Tread

Whiplash

Coward, screaming, hiding, bleeding
Put your fear to the rear and face the pain
Driven to violence, power devours
Evil comes around, brings you down
'Til you're insane

No fear
No one strips me of my pride
You've been warned
Now get out of my way
Corruption, hunger, possessed by desire
There's always one man out to rule the world.
Killing, slaughter, destruction, order
Wish this fucking nightmare would go away

No fear
No one strips me of my pride
I'd rather die with dignity
No fear
I will fight until I fall
But I won't fall 'til humanity is saved

History, repeated, always defeated
Freedom rules, you can't take that from me
Power to the people, eliminate the evil
If we all stand tall our strength won't waste away

No fear
No one strips me of my pride
I'd rather die with dignity
No fear
I will fight until I fall
You've been warned, someone's got to pay
