

## Come On

## White Lies

I'm sick of all the noise from the storm in here  
I need a little quiet to get things clear  
But tell me something true, or a lie I know  
And show me that you're there, and I'm not alone now

So if the right words feel like the wrong kind to say  
I'll keep my mouth shut, darling  
Hope things all work out okay

But there's something wrong  
Come on, come on, you know  
We just play along  
Come on, come on, you know

My war is over right when my heart is spent  
Though you know they overwrite with the best intents  
Oh, tomorrow is a day like this gone by  
I'll try to keep my hopes from getting up too high now

So if the right words feel like the wrong kind to say  
I'll keep my mouth shut, darling  
Hope things all work out okay

But there's something wrong  
Come on, come on, you know  
We just play along  
Come on, come on, you know

Love is just a word that ties the gap between you and I  
'Cause you know there's something wrong  
You've known it for a while, come on  
Love is just a word that ties the gap between you and I  
'Cause you know there's something wrong  
You've known it for a while, come on  
Love is just a word that ties the gap between you and I  
'Cause you know there's something wrong  
You've known it for a while, come on  
Love is just a word that ties the gap between you and I  
'Cause you know there's something wrong  
You've known it for a while, come on

But there's something wrong  
Come on, come on, you know  
We just play along  
Come on, come on, you know

But there's something wrong  
Come on, come on, you know  
We just play along  
Come on, come on, you know
