

# Warsong

White Lion

I got the call one summer night  
He said you're on tomorrow's flight  
My mother cried, my sister too  
My father said I'm proud of you, yes I am son

I can't believe it's true, we're going after who  
And still I wish that I just knew

What are we fighting for?  
When the price we pay is endless war  
What are we fighting for?  
All we know we need is peace

Though I'm blind to what I see  
They tell me there's an enemy  
I know I gotta get outta here  
Insanity is drawing near, I'm going crazy

Can't take it anymore, I've knocked on heaven's door  
No I'm not dying for this war

What are we fighting for?  
When the price we pay is endless war  
What are we fighting for?  
All we know we need is peace

What are we fighting for?  
Can't we learn from what we've done before  
What are we fighting for?  
Yeah, when no one ever wins, in war

A young man returns from war  
Where he didn't know, what he was fighting for  
The streets remained the same but people changed  
The medals on his chest, didn't mean a thing  
A tear dropped from the corner of his eye, did he come home?

Now, listen up, my grandpa died on Normandy  
My brother is still in Vietnam, he ain't comin' home  
I know there's nothing good in war  
I know 'cause I've been there before, oh yes, I have

So what am I gonna do, I know this war ain't through  
And still I wish that I just knew

What are we fighting for?  
When the price we pay is endless war  
What are we fighting for?  
All we know we need is peace

What are we fighting for?  
Can't we learn form what we've done before  
What are we fighting for?  
When no one ever wins

What are we fighting for?  
When the price we pay is endless war

What are we fighting for?  
When all we need is peace

What are we fighting for?  
Can't we learn form what we've done before  
What are we fighting for?  
When no one ever wins, in war, in war, in war, in war
