No Other Love

Whitecross

I must have been crazy,

I must have been crazy, I must have been blind To just keep walking in the darkness But you've been patient all of this time Well now I'm making you a promise

I'll be with you the rest of my life

No other love can make me feel the way you do No other love can keep the stars shining I'll never walk away, I'm on my knees this day I'm gonna love you like no other love

You opened your heart up, you opened my eyes You never quit you never gave in I was too selfish to realize It was my life that you were saving

I wanna thank you for the rest of my days

No other love can make me feel the way you do No other love can keep the stars shining I'll never walk away, I'm on my knees this day I'm gonna love you like no other love

I give everything to you No, it'll never be enough Oh, you set my soul on fire like no other love

I wanna thank you for the rest of my days

No other love can make me feel the way you do No other love can keep the stars shining I'll never walk away, I'm on my knees this day I'm gonna love you like no other No other love can make me feel the way you do No other love can keep the stars shining I'll never walk away, I'm on my knees this day I'm gonna love you like no other love
