Come Out To Go

Wide Mouth Mason

You've been doing what you used to do Go the places that it took you to Thinking over all the things you knew That you know you don't know now

And you wonder what you're on about Who's the loser talking out your mouth He's making like he figured it out When you know he don't know how

Light in inside, take it outside Light in inside, take it outside But if you're gonna come You gotta leave now Because we come out to go

Lose it inside, find it outside
Lose it inside, find it outside
But if you're gonna come
You gotta leave now
Because we come out
We come out to go

You've been seeing who you used to see Been the person that you used to be You're delivering a eulogy For the things you're cutting out

You've been a sucker for the last time You saw it coming but you held the line You've been slipping on a road of ice And you're spun out upside down

Light in inside, take it outside Light it inside, take it outside But if you're gonna come You gotta leave now Because we come out to go

Lose it inside, find it outside
Lose it inside, find it outside
But if you're gonna come
You gotta leave now
Because we come out
We come out to go

You're building up to it Let's go and do it We'll make it out alright We'll catch a new ride

Here it comes, here it comes Get a grip on it Here it comes, here it comes Let go of it

Here it comes, here it comes

Here it comes
You better not look down
