

Glass Tambourine

Wild Flag

Listen to the music, to the music
Before it passes you by
If you don't lose it
You're gonna use it
The black lullaby

Did I ever tell you I was looking through you
Cracked mirrors on the lawn
Still it's summer somewhere, summer somewhere
The crystal song
Of a glass tambourine
Don't shake it like you mean
A glass tambourine
Don't break it on the scene

Interstellar reverb
In reverse
I need you today
Hit me with it sometime
When you shine
Vibrational waves
Of a glass tambourine
Don't shake it like you mean
A glass tambourine
Don't break it on the scene

I thought the end of time was near
But now I can hear
I thought the end of time was near
But now I can hear

Glass tambourine, glass tambourine, glass tambourine

(Don't break it, don't break it
Glass tambourine)
