Maybe it's me
Maybe it's you
God only knows how it happened
But we know it's true
Baby
I get the feeling that I've found
My everything, when you're around
And I'm lovin' the way
(You kiss me gently)
And whisper my name
Woah

See

The situation that we need to handle So won't you come lay with me So we can finally live our dreams (2x)

There will never be
Another who can love you like me
I'll take my time, we ain't gotta rush
Your body's than my touch
The sexy vibe I get from you
I like it
So exciting
And, I can't control myself
I'm in the mood, so don't fight it
Come on here cause I got this for you
