

I Am the Forest

Willie Nelson

I'll always be with you for as long as you please
For I am the forest but you are the trees
I'm empty without you so come grow within me
For I am the forest and you are the trees
And the heavens need romance so love never dies
You'll be the stars dear and I'll be the sky
And should any of this find us let them all be forewarned
That you are the thunder and I am the storm
And I'll always be with you for as long as you please
For I am the forest and you are the trees
I'll always be with you for as long as you please
For I am the forest but you are the trees

I'll always be with you for as long as you please
For I am the forest but you are the trees
