Stay Away from Lonely Places

Willie Nelson

```
Stay away from lonely places follow the crowd
Stay around familiar faces play the music loud
Be seen at all the parties dress yourself in style
Stay away from lonely places for awhile

Stay away from lonely places
till you learn to live alone
Someone's outstretched arms are waiting
to stay with you at least till dawn
Remember that sorrow prospers in a heart that never smiles
So stay away from lonely places for awhile

Stay away from lonely places
it takes time to learn to live alone
And someone's outstretched arms are waiting
to stay with you at least till dawn
Remember that sorrow prospers in a heart that never smiles
So stay away from lonely places for awhile
```
