

True Love

Willie Nelson

I followed you to hell and back
I'll follow you again
No matter where you take me
It's some place that I ain't been
And I'll go to hell believing
True love, you're still my friend

From the start to the finish
And until the bitter end
I'll live my life believing
True love, you're still my friend
The whole damn thing is over
And we reach our journey's end
I'll leave this world believing
True love, you're still my friend

The road was always rocky
Trouble waitin' 'round every bend
I'll go to hell believing
True love, you're still my friend
You taught me how to twist and turn
And bend before I break
And fake it till I make it
All for true love's sake
You're worth all the heartaches
And I'd do it all again
I'll leave this world believing
True love, you're still my friend

When the whole damn thing is over
Never to be again
I'll go to hell believing
True love, you're still my friend
I can't escape this prison
This cell I'm living in
Where memories guard the inmates
And true love, you're still my friend
