

Without the Night

Winger

Watch the sun go down
It's just my luck again
I can hear the sound of your voice
Haunting me again

But just the sound is not enough
I try to wait but I'm not that tough
When I need your love
It seems like forever

Without the night
This would be so much easier
Without the night
Reminding me of the pain
Without the night
I could keep my heart from believing
I'll be fine without the night

I remember you used to say
How much you've been through
Laugh how easy the games we play
Can break your heart in two

All for love we've given up
You try to wait but you're not that tough
Too many times when you need me near
It seems like forever

Without the night
This would be so much easier
Without the night
Reminding me of the pain
Without the night
I could keep my heart from believing
I'll be fine without the night
Without the night.

All for love I've given up
I try to wait but I'm not that tough
Too many times when I need you here
It seems like forever

Without the night
This would be so much easier
Without the night
Reminding me of the pain
Without the night
I could keep my heart from believing
I'll be fine without the night

This would be so much easier
Reminding me of the pain
Without the night
Keep my heart from believing
I'll be fine without the night
Whoa, I'll be fine without the night.
