

On The Edge Of Eternity

Winterborn

Out of this time my spirit flies away
I left behind this restless world
Somewhere out there, beyond the horizon
There's my destiny, feelings of grand mystery

Oh, immortality is calling
My soul is searching for peace and harmony

Now I'm heading for the space, to see the light divine
And this journey never ends, it goes on evermore

I past the universe, and stars so bright
In my solitude, out of all pain
Reflection from past, things that I've said and done
They all came to me from shadows of my history

Oh, immortality is calling
My soul is searching for peace and harmony

Now I'm heading for the space, to see the light divine
And the journey never ends, it goes on evermore

It goes on evermore

Is there a chance to born again?
Are they waiting for me in hell?
Or reincarnate as something else?
Can I live forever, live forever?

I break the chains, finally I found my peace of mind
There's no remorse, I should carry on
In my dreams, the portrait of the future is so clear
Oh, what I see, seems so unreal
Oh, I don't wanna wake up reality
It's my eternity

Still I'm heading for the space, to see the light divine
Though this journey never ends
I can believe what I dare to dream
