

The Winter war

Winterborn

Now when the war brings dark clouds above, unfolding the doors
of disaster
There's no reason for this all
Humanity, will vanish into snow, for their country, they're fighting
From the distance they hear the echoes of battle cries

Charging in line
Under rapid fire
Blaze of the guns lights the winter sky, and iron fills the air

Until the end they'll fight again, to save the nation
There is no way they give it up, it's do or die

In this killing ground, in snow red as blood, the true heroes are lying
They are never coming back
The enemy will face hell on earth in the fields of this madness
They will pray for their god but there is no god in here

Charging in line
Under rapid fire
Blaze of the guns lights the winter sky, and iron fills the air

Until the end they'll fight again, to save the nation
There is no way they give it up, it's do or die
