

Sleeping Stars

Wintersun

Oh sleeping stars, why are you so sad tonight
Oh sleeping stars, will you shine for me tonight
Oh sleeping stars

Can you see them float in the night sky
Can you hear those echoes of their sweet cries, creating a tune
Can you see them shine so bright
Can you feel their loneliness through their cold light, touching you

My eyes feel so heavy when the stars are calling me
- Join with us eternally -
I'm falling in deep trance and my powers are weakening
I'm falling in a world between dreams and reality

I am now alone in the silent light
And there's nothing but darkness around me
Deeper into unknown the strange light is guiding me
Wake me until it's too late

Suddenly I feel a warmth go through my body
But I feel that a part of me has died, I sense the change in me
I must have been away so long
So please stay with me for a while
