

The Fall

Wipers

Living on these stale pills so long I can't stand it
I can tell in your heart
You're so understanding
Will you want to stick around and take another fall?

Bringing it on in here - right here where your standing
I can tell by your smile - it's judging expression
It's getting clear you were coming here to take another fall
I could be wrong
Is it over now?
It's hitting ground
I can tell by the way you stare you see where it's heading
I can see in your heart
You know that it's there
When you give it out
You chicken out
And say that it's gone
You could be wrong
It could happen now
It could be strong

Living on these stale pills so long I can't stand it
I can tell in your heart
You're so understanding
When you give it out
You chicken out
And say that it's gone
You could be wrong
It could happen now
It could be strong
Just tell me now
You could be wrong
It could happen now
It could be strong...yeah
