

## Into The Fire

Wolf Gang

Sit back in the seats if you don't want to go  
Cause the lights are out tonight  
But you will see our style burning in the sky  
As we set the town on fire

We want to shake up the people  
They've been sleeping for too long  
And the whispers from the spirits  
of the men who drew that dawn

Now is our chance  
Now is our chance  
And we can dance into the fire

There are marks on the street of the way to go  
If you feel they did you wrong

And so tonight is your chance  
For in the hour you may not live that long  
We have a message to inspire  
The loneliest of souls

When the town is on fire  
The world will hear our call

Now is our chance  
Now is our chance  
And we can dance into the fire

Now is our chance  
Now is our chance  
And we can dance into the fire

Now is our chance  
Now is our chance  
And we can dance, and we can dance into the fire

Now is our chance  
And we can dance into the fire

Now is our chance  
And we can dance into the fire
