

# Underneath The Night

Wolf Gang

Underneath the night I stare down at the city lights  
I knew the day would come when your words hit me with surprise  
Well, your life is what you make it with reasons to believe

You always said you'd never grow old in the streets below  
But now the grades of time are moving faster than before  
Well, your life is what you make it with reasons to believe

But if you could believe in, if you could believe in me

So turn your face away, tell me that you never cared  
Speak a line say I'm right before you disappear  
With your arms around my shoulders there were reasons to believe

But if you could believe in, if you could believe in me  
But if you could believe in, if you could believe in me

Nothing but your doubt can take you from in love  
Let it go, let it go  
If you can't believe, I know you won't be free to let go  
Let me go

And if you could believe in, if you could believe in me  
And if you could believe in, if you could believe in me
