

# Devil Moon

Wolf

A crimson sky for a crimson mind  
An evil spiral on the wind  
Lurking in the shadows and the mist

The dust is full of ancient tears  
That fell to the ground and disappeared  
While the same old face seemed to sneer in silence

My precious gold has turned to rust  
And my former victory to bitter loss  
Forgotten by the black and by the white  
In an unholy alliance

The only light that lights my way  
Enlightens only my evil ways  
My way is not the narrow one  
But the one that leads to pain

Pain for you pleases me  
Please forgive me for my deeds  
Indeed it's hard for you to see  
That you alone can set me free

Each dawn a piece of my heart dies  
No peace of mind until night  
My mind is ticking unclockwise  
Each second closer to demise

To be free, a thought unreal  
Unravel the riddle and break the seal  
To unlock these chains for me  
Could be a fatal deal

Devil Moon  
A face in the dark  
Lights a sinister spark

Devil Moon  
Devil Moon  
Devil Moon  
A fearsome sight  
In the blackest night

Raise the dead  
Kill the light  
Orbiting force  
In the night  
No way back  
No return  
Moon turns to blood  
The sun is black and burned
