

# Golden Tears

Wolfheart

A scream from the past, the story of the truth (of the truth)  
It came from the frost of my mind  
The breath in the dark, oh my heart is burning (burning so hot)  
Dark eyes are burning, I wake up with thousands of more

Stream from the sky  
A flow takes me down  
The trees comes up to shine  
Then comes the rain with golden tears  
Stream from the sky  
A flow takes me down  
The trees comes up to shine  
Then comes the rain with golden tears

Freezing wind blows, my eyes deep black  
The night has fallen over and over the land (over the frozen land)  
All the dreams will shattered, I'm gone so far (so fucking far)  
Only darkness and suffering, I left behind

"All the dreams will shattered, I'm gone so far  
Only darkness and suffering, I left behind"

Stream from the sky  
A flow takes me down  
The trees comes up to shine  
Then comes the rain with golden tears  
Stream from the sky  
A flow takes me down  
The trees comes up to shine  
Then comes the rain with golden tears
