

She Got It

Wolfmother

I got a girl that's been on my mind
I just been thinking about her all the time
I tell something something sweet
I tell her something that I like to repeat

She got it

I see you standing up over there
I see you looking like you're going somewhere
I want to tell you as you walk away
Some of these words that I wanted to say

She got it

Oh give me sugar make it sweet
Oh give me something oh that I need
Oh pick a number make it 9
Oh you can call me anytime

And I know, I think I really know, Just what you said

I like the way that you walk down the street
You look like somebody that I'd like to meet
I wanna give you everything I could
I'd go and take the bad things and make them good

She got it
