

Embrace

Wolverine

You changed all that I am
Once you opened your eyes
Right there I turned off the world
And then there were you and I

Whole again, you have defined who I am
Innocence helps me retain what I am

One breath was all they required
To deprive us all of our bliss
Right there I saw you were lost
And there wouldn't be another "us"

I fell and I fell, into a dark and bottomless pit
Darkness embraced my whole world

I'll trade you my life, spare you my heart
Without you I still would be lost, I'd drown in an ocean
I am you, you are me, we cannot part
A future's embrace clad with hope is ours...

Slowly dark clouds dispersed
Offered a passage of life
And they gave us a reason to carry on
What we believed wouldn't be suddenly was

I'll trade you my life, spare you my heart
Without you I still would be lost, I'd drown in an ocean
I am you, you are me, we cannot part
A future's embrace clad with hope is ours...

Dark clouds will shadow the roads we'll be walking
And questions will challenge our minds and our hopes
But I'm sure that devotion and faith will make darkness subside
For the power of love is embodied and born in our strong embrace...
