

And I Fell Back Alone

World Party

If we walk through each other as we leave the room
You don't have to tell me that it's over
Whoever you were then I never really knew
You got no need to know me now

You can't see the bottom from the top
You don't see the edge before you drop
And I fell back alone
And I fell back alone and I fell

Is love trying all the right moves
To stop the walls from coming up?
But I can't look over this at all

I'm in some different place
Strangest pictures on my wall
I drew them yesterday
I never thought, I'd find the time at all

You can't see the bottom from the top
You don't see the edge before you drop
And I fell back alone and I fell

Forever doesn't mean forever
It just means maybe some other time or place
But how can two souls still eat together
When life has lost its taste?

Can we lie together, bed and face to face
Not see anyone at all?
It's time to make a wish and let it float on down the stream
We can cry a little for a time that could have been

But live it well, my love
Live it all, my love
Live it long, my love
Live it all, my love

You don't see the bottom from the top
You don't see the edge before you drop
And I fell back alone
And I fell back alone and I fell
