## **Baby I Need You**

Baby I need you Baby I need you in my life And I want to hold tight Only you and me together Baby I need you Baby I need you in my life Hold on till the morning light We can make it last forever

How can I find the way And the key into your heart Let this magic feeling grow I can?t live when we?re apart You are all that I can see Come and make my dreams come true Baby you?re the one for me I need love and want it with you

You took my heart away Never give it back to me All I want is you to stay Free my soul you got the key I could never leave you girl What I feel for you is true Baby cos you are my world I need love and I want it with you
