

## Gotta Get It Right

Worlds Apart

Got to get it right  
Remember the time when I first told you  
I'd be around forever  
Whenever you need me girl I'll hold you  
Funny how things get changed

People have always tried to  
Keep us both apart  
But you know  
I've always loved you from the start

I've got to get it right girl baby  
I've got to get it right just for you  
I've got to get it right girl sugar  
Gotta get it right - gotta get it right

You gave me your heart I said don't worry  
'Cos I won't break it  
We're taking our time girl there's no hurry  
I know we can make it work

Even the best made plans and dreams can go astray  
Never thought that we would ever  
Let our only love just slip away

In a quiet moment  
When a private thought slips through  
And I think of all the love that we once had
