

# Voxel Mitosis

Wormed

Organic material tunnel  
Embryonic stellar drones  
Heat

Visions flashes shiny chaos  
Loud flickers of light repeated  
Worm skinholes around me  
Stellar frost inserted again

Emanating from the depths of hole  
I have arrived in pieces  
I am the incubator now  
One stellar insect

Why everything is so empty? Empty  
Why the light is going out? Going out  
Why the end of horizon are here above my?

Emanating from the depths of hole  
I have arrived in pieces  
I am the incubator now  
One stellar insect

Multiple voxels, the edge  
Is the only that I could see  
This black hole, deep  
Distorting the endless space

Voxel

Lines, infinite, here for special reason  
Volumetric space subdivided into voxels

In our minds eye, our mind...

Emanating from the depths of hole

Immense crater  
Mitosis is now finished  
Accumulating all energy  
Of ions scab, petrified

Depth is not far, descent is short

Inside it / millions / degrees / under / zero  
I couldnt feel human form  
Crack sounds spiral of noise

Depth is not far
