

I can see what you saw through my eyes  
Every move you made I visualize  
I dust for prints, I look through magnified eyes  
I'm the confidant of behavioral science

And you're having a good time  
Making innocents bleed  
Now it's all I can bear  
I'm gonna make you disappear

I got a double major in criminology  
You'd have to be invisible to get past me  
I got a nose like a hound on a fox's path  
I keep myself busy huntin' psychopaths

Are you having a good time?  
I see you've made the front page  
Now it's all I can bear  
I'm gonna make you disappear  
I can make you disappear

You took your time and picked your crime  
One in a million for me to find  
One little clue you left behind  
Evaluate your mistake  
Got me a sign, now you're running out of time

Everybody knows me by name  
But they don't recognize me when I change  
I swear I got eyes in the back of my head  
I can see in the dark, I got the infrared

Got you in my sights, there's no place to run  
You know it's too late,  
'cause there's a voice in your head  
But you don't wanna hear  
Now enough has been said  
It's time to make you disappear

I can make you disappear  
And you're having a good time  
Making innocents bleed  
It's all I can bear  
I'm gonna make you disappear
