I stay on the 64 squares, while patrolling the center Trading space from material, the time zone, I enter It's calculated by movement, from pushed pieces Advancements and development, once the pawn reaches To 8th ranked, now heavily armed with a tank My opponent's base is threatend, soldiers cut with shanks Moved all my small pieces, MC's are driven back Unable to avoid capture from the attack Such movement, is naturally quite unsound Men is badly placed upon dangerous grounds Loosening their position, before they were strongly posted

Before the double rooks had approached it They must of been quick to ignore the principles Rock a V and an effective God is invincible A strategic plan, just the way I envisioned it Many fallen soldiers in complete imprisonment
