## Angel

## :Wumpscut:

Angel, come to me To me, come to me Angel, belong to me To me, belong to me Angel, you have wings To fly, fly to me Angel, do you doubt? No need to have doubt Angel, feel my love My love for you Feel my love for you Angel, carry me To you, to your home, to paradise Angel, I would lie for you For you, just for you, with my yearning heart And angel, I would die for you For you, just for you, with my burning heart Angel, don't feel liable For me and my pain don't feel liable 'Cause angels must be free High up from this world in eternity Angel, I could clip your wings To catch all your love, to calm your pain But angel, this would be so wrong You would bleed to death immediately So angel, come to me Heal my glaring pain voluntarily I love you
