It's time to face it

We walk alone In the unknown We live to win another victory We are the young Dying sons We live to change the face of history so be afraid It's the price we pay The only easy day was yesterday So hear our voice, We have a choice, It's time to face it We are three We are two We are one We will stand together Number one Number one The chosen ones We are one We are one we will fight forever we are one and we won't die young We are the bold United souls We live to win another victory Our sacred scars Show who we are And tell the story of our memories Don't be afraid It's the price we pay The only easy day was yesterday So hear our voice We have a choice It's time to face it We are one We are one We are one We will stand together Number one Number one The chosen ones We are one We are one we will fight forever we are one and we won't die young We walk alone In the unknown We live to win another victory Our sacred scars Show who we are

So be afraid
It's the price we pay
The only easy day was yesterday
So hear our voice
We have a choice
It's time to face it
