

# Levitate

Wynter Gordon

Stare at the light over me it's alright  
And it's hanging  
I wait for it to come down  
Sound of my heart it's a lot beating faster  
It's banging  
I wait for it to slow down  
Loud as I climb hear the voices behind  
I keep climbing, oh I'm climbing  
I'm not falling,

Levitate, give yourself away  
We could be flying,  
We might fly away  
Levitate, give yourself away  
We could be flying,  
We might fly away, levitate

Fear in the air and I'm anxious and scared  
But I'm rising  
I think I'm gonna fall down  
Moment to wait till I'm happy and safe  
So I'm reaching, I think I need to come down  
Burning down air in the way of it all  
It's finding, I keep trying  
This is flying, oh

Levitate, give yourself away  
We could be flying,  
We might fly away  
Levitate, give yourself away  
We could be flying,  
We might fly away, levitate

Take me up, till I can't see the ground  
Little people, look so small when I look down  
Wanna go, so far away, out there in space  
Floating away  
Take me up, till I can't see the ground  
Little people, look so small when I look down  
Wanna go, so far away, out there in space  
Floating away

Levitate, give yourself away  
We could be flying,  
We might fly away  
Levitate, give yourself away  
We could be flying,  
We might fly away, levitate.
